A cerebrovascular incident including infarction of brain tissue, cerebral and subarachnoid haemorrhage, intracerebral embolism and cerebral thrombosis resulting in permanent neurological deficit. This diagnosis must be supported by all of the following conditions:

- (a) Evidence of permanent clinical neurological deficit confirmed by a neurologist at least 6 weeks after the event; and
- (b) Findings on Magnetic Resonance Imaging, Computerised Tomography, or other reliable imaging techniques consistent with the diagnosis of a new stroke.

The following are excluded:

- (a) Transient Ischaemic Attacks;
- (b) Brain damage due to an accident or injury, infection, vasculitis, and inflammatory disease;
- (c) Vascular disease affecting the eye or optic nerve;
- (d) Ischaemic disorders of the vestibular system; and
- (e) Secondary haemorrhage within a pre-existing cerebral lesion.

(33) OPEN CHEST SURGERY TO AORTA

The actual undergoing of major surgery to repair or correct an aneurysm, narrowing, obstruction or dissection of the aorta through surgical opening of the chest or abdomen. For the purpose of this definition aorta, shall mean the thoracic and abdominal aorta but not its branches.

Surgery performed using only minimally invasive or intra-arterial techniques are excluded.

(34) SYSTEMIC LUPUS ERYTHEMATOSUS WITH LUPUS NEPHRITIS

The unequivocal diagnosis of Systemic Lupus Erythematosus (SLE) based on recognised diagnostic criteria and supported with clinical and laboratory evidence. In respect of this contract, systemic lupus erythematosus will be restricted to those forms of systemic lupus erythematosus which involve the kidneys (Class III to Class VI Lupus Nephritis, established by renal biopsy, and in accordance with the RPS/ISN classification system). The final diagnosis must be confirmed by a certified doctor specialising in Rheumatology and Immunology.

The RPS/ISN classification of lupus nephritis:

Class I Minimal mesangial lupus nephritis

Class II Mesangial proliferative lupus nephritis

Class III Focal lupus nephritis (active and chronic; proliferative and sclerosing)

Class IV Diffuse lupus nephritis (active and chronic; proliferative and sclerosing; segmental and global)

Class V Membranous lupus nephritis

Class VI Advanced sclerosis lupus nephritis

(35) SEVERE ENCEPHALITIS

Severe inflammation of brain substance (cerebral hemisphere, brainstem or cerebellum) and resulting in permanent neurological deficit which must be documented for at least 6 weeks. This diagnosis must be certified by a consultant neurologist and supported by any confirmatory diagnostic tests.

Encephalitis caused by HIV infection is excluded.

(36) ANGIOPLASTY & OTHER INVASIVE TREATMENT FOR CORONARY ARTERY

The actual undergoing of balloon angioplasty or similar intra-arterial catheter procedure to correct a narrowing of minimum 60% stenosis, of one or more major coronary arteries as shown by angiographic evidence. The revascularisation must be considered medically necessary by a consultant cardiologist.

Coronary arteries herein refer to left main stem, left anterior descending, circumflex and right coronary artery.

Diagnostic angiography is excluded.

The following two terms can be found in some of the above definitions, and their meanings are as follows:

1. Permanent neurological deficit

Permanent means expected to last throughout the lifetime of the Life Assured.

Permanent neurological deficit means symptoms of dysfunction in the nervous system that are present on clinical examination and expected to last throughout the lifetime of the Life Assured. Symptoms that are covered include numbness, paralysis, localized weakness, dysarthria (difficulty with speech), aphasia (inability to speak), dysphagia (difficulty swallowing), visual impairment, difficulty in walking, lack of coordination, tremor, seizures, dementia, delirium and coma.

2. Activities of Daily Living (ADLs)

The six "Activities of Daily Living" are:

- | | |
|--------------------|---|
| (i) Washing | the ability to wash in the bath or shower (including getting into and out of the bath or shower) or wash satisfactorily by other means; |
| (ii) Dressing | the ability to put on, take off, secure and unfasten all garments and, as appropriate, any braces, artificial limbs or other surgical appliances; |
| (iii) Transferring | the ability to move from a bed to an upright chair or wheelchair and vice versa; |
| (iv) Mobility | the ability to move indoors from room to room on level surfaces; |
| (v) Toileting | the ability to use the lavatory or otherwise manage bowel and bladder functions so as to maintain a satisfactory level of personal hygiene; |
